

FreeGOGÉ ES-08S Scooter de compartir eléctricos de 8,5 pulgadas con aplicación telefónica

Product Description:
 The scooter is designed for urban mobility, featuring a compact and lightweight frame. It is equipped with a high-capacity battery and a powerful motor, ensuring a long range and quick acceleration. The scooter also includes a digital display on the handlebar for speed, battery level, and other essential information. Safety features include a front and rear LED light system and a sturdy deck for secure footing.

Smartphone App & User Interface
 The scooter is managed through a user-friendly smartphone application. The app provides real-time location tracking, battery status, and ride history. Below the app images is a diagram showing the connection between the smartphone, the scooter's control unit, and the battery.

BMS (Battery Management System)
 The scooter features a sophisticated BMS to ensure the safety and longevity of the battery. The system includes:

- Overcharge protection
- Over-discharge protection
- Overcurrent protection
- Temperature monitoring
- Short-circuit protection
- Cell balancing
