

Patinete eléctrico de 3 ruedas para niños modelo K3

The image shows a vertical strip of content from a document, likely a technical manual or project report. It includes several photographs of small-scale models or toys: a yellow car-like object, a pink scooter, a white airplane, and a blue and white mechanical assembly. Below these images is a technical diagram showing a cross-section of a mechanical part with various components labeled. The diagram includes a central shaft, a gear, and a housing. The text below the diagram is too small to read but appears to be a list of parts or a table of specifications. At the bottom of the strip, there are several small, colorful photographs showing a group of people, possibly students or researchers, working together in a laboratory or workshop setting.
