Model E10 Pro

10
INCH

120KG
MAX LOAD

500W
MOTOR

40
KM/H

Powerful performance for uphill: 24%
Motor power: 500W (Peak 800W)

BRAKE

Features a disc braking and EABS regenerative anti-lock braking system for an efficient, responsive braking distance of just 13.1 ft.

Effective Suspension

Highly efficient shock absorber as suspension to provide a comfortable and stable riding feeling on any bumpy road.

SHOCK-ABSORBING TIRES

The 10" inflatable rubber tire(with inner tube) have great shock absorption and anti-slip treads.

Coupled with a 400W brushless DC motor for stable power output,

E10 PRO Electric Scooter is set to deliver

a smoother riding experience.

FOLDS IN 3 EASY STEPS

Flip, fold, clip. Simply flip down the folding lever to fold, and the scooter bell catches onto a latch on the rear wheel. The result is a compact and secure folding design that's perfect for stowing E10 PRO Electric Scooter away at home, in the office, or in the trunk of a car.

OFFICE

CAR TRUNK

What scenarios can E10 PRO be used in?

city commute

Weekend release

Transport of trunk

Offroad

the subway

ELEGANT LCD DISPLAY

view current speed, remaining power, and other real-time riding statistics.

What is new for new E10 pro ?

1. We solved the issue of front tube break when pushed/pulled too much during moving. We made the main tube to be high quality steel.
 2. We improved the folding machnics with creative technology. It will not shake like before. The old design shakes easily and can not fold any more after half a year.
 3. The folding part will not be break down even if you forget to push the button. It will not fold by accident.
 4. The data display changed to the round LED display that is more clear and nice looking and stronger (not easy to be broken as before.)
 5. Changed to front wheel motor drive.
 7. We add rear suspension that feels more comfortable.
 8. Stronger and nice
-
1. Good quality & affordable price:
a cost-effective product will be the best seller.
 2. Short & fold-able body: you just only need to fold its head and then you can put to your car trunk easily.
 3. Smart controller inside: stable and durable. 10 years of PCB design and software for E-bike industry.
