**What is the new feature of the new ES-08s V1.9?**

We solved an issue where the front tube was broken when pushing / pulling too much while in motion. The headers we manufacture are high quality steel tubes.

We have improved folding machines with innovative technology. It will not vibrate as it used to be. The old design is easy to shake and no longer foldable after half a year.

3. Even if you forget to press the button, the folded part will not be damaged. It does not fold accidentally.
4. The data display becomes a circular LED display, which is clearer, beautiful and stronger (not easily damaged).
5. Change to the front wheel drive.
6. The battery is placed under the pedal.

**Freego**®

7. We added a more comfortable rear suspension.

8. Stronger and better.

1. Good quality and acceptable price:

As we all know, if there are enough options, consumers are more willing to pay for it, especially in today's world. Competition is everywhere. But people also care about quality. Therefore, cost-effective products will be the best-selling products.

2. Short and foldable body: You only need to fold the head, then you can easily put it in the trunk of your car.

3. Intelligent control inside: stable and durable. 10 years of PCB design and software for the electric bike industry.

### **OEM factory**
